

Katerina Deligiannidou, Pre-Sales Engineer, John Glykos, Global Sales Director and Constantine Vlachavas, Global Sales Representative

Scytales Sales Team Strengthened

Scytales is extremely proud to announce that we have a new super duo sales team in place. John Glykos, Global Sales Director and Constantine Vlachavas, Global Sales Representative will be supported by our brilliant Pre-Sales Engineer Katerina Deligiannidou. The team has already kick-started activities such as attending several conferences and exhibitions, among them the Identity Management Europe, 4 October 2022, Utrecht. The team has produced 40 new demo videos that showcase all the specific features of our world-leading mobile identification and onboarding solutions which we are looking forward to sharing with our partners and new customers.

PARIS EXPO-VERSAILLES, FRANCE, 29 NOVEMBER - 1 DECEMBER

UPCOMING: TRUSTECH 2022

Scytales is excited to announce its presence as sponsor and exhibitor at TRUSTECH 2022. We will have our team onsite ready to demo the **Scytales EUDI Wallet (European Union Digital Identity Wallet)** based on the CEN WG 20; the **Scytales ISO 18013-5 Mobile Driving License** that we are currently running in production with our partner for the state of Utah; the **Scytales on-boarding products**, the **ICAO 9303 compliant mID (Mobile Digital ID)** and **Derived Mobile IDs (NFC eIDAS/PIV Smart Card IDs going mobile)**, both accessing Web Services/Portals on Highest Level of Assurance.

We are also presenting our **validation mechanisms for relying partners** both in near field (attended) and over the screen (unattended) for retail, banking, transport/logistics and government.

Common with all Scytales' technologies are the capabilities to "read-consume-validate" the holder's photo, in real-time in online and offline modes, with global interoperability.

Scytales and its team are paving the way, utilizing the most advanced, and newly standardized technology going mobile.

We look forward to connect even running up to the event so please contact our Sales Team at sales@scytales.com if you wish to initiate a dialogue in advance and/or let us know you would like to chat with us at our **Booth Stand 5.2**.

Our colleagues, Katerina, Constantine and John are Warmly Welcoming you all!

BALTIMORE, MD, 13-15 SEPTEMBER

AAMVA Annual International Conference

The Scytales Team had a very successful participation at AIC 2022 exhibiting with an impressive booth side by side with our partner GET Group NA. Scytales and GET gave visitors the smooth experience of "travelling" with a mobile ID, crossing the "border" between the "US" and "Sweden. The UTAH mDL program was the big bustle, and we proudly talked about our successful partnership with UTAH DLD on this first and so far only ISO 18103-5 mDL scheme in the world. AIC Baltimore was a fantastic event, and Scytales' team not only connected with delegations from 25+ states but also had a great time socializing with the close-knit, very friendly and welcoming AAMVA community. We look forward to always supporting and being part of all the exciting conversations about mDL, its ecosystem and the absolute importance of adhering to the ISO standard for full interoperability, privacy and security. At AIC Baltimore we once again had the opportunity to demonstrate how the mDL works, how interoperability is reached and how the ecosystem is sealed with Trust. Thank you to everyone who came by our booth to meet, discuss, get a demo, connect and chat. We definitely look forward to the upcoming events organized by AAMVA.

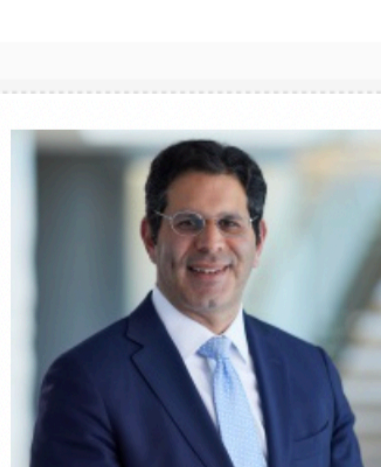

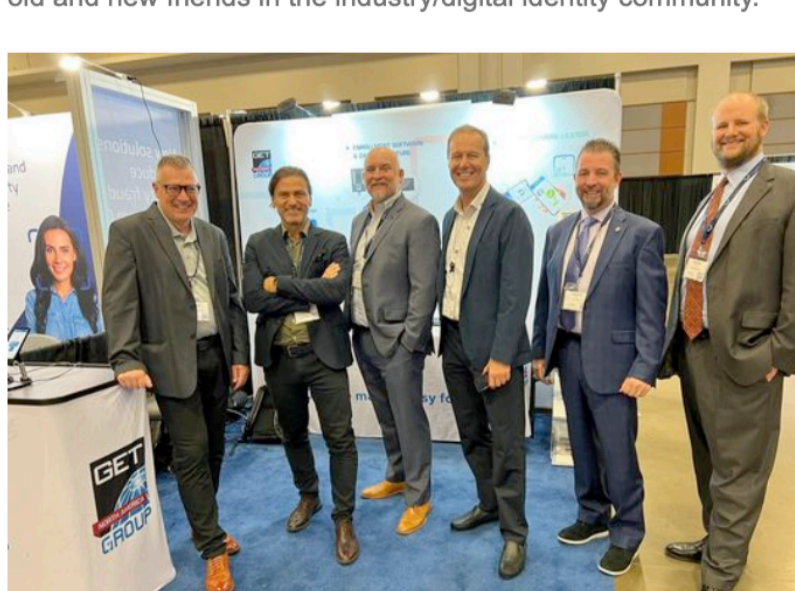

Vangelis Sakkopoulos (Dr.) Chief Technology Officer, Scytales, proudly showcasing Scytales mDL at a TSA Station

WASHINGTON, DC, 4-5 OCTOBER

Identity Week America 2022

Geoff Slagle, President & Chief Business Development Officer and Jared Hubbard VP, Operations and General Counsel from Scytales attended Identity Week America and met up with the team from our partner GET Group NA as well as connected with old and new friends in the industry/digital identity community.

SCY STUDIOS EPISODE 7 - IF YOU HAVE MISSED THIS EPISODE!

Global pandemic; Global standards; and Global progress on digital identity challenges

Geoff Slagle visits with Jeremy Grant, the prominent and well-known authority within the fields of identity, privacy, and cybersecurity, who has served in a range of leadership positions spanning government and industry. He serves as Venable's Managing Director of Technology Business Strategy and is a member of the firm's eCommerce, Privacy, and Cybersecurity Group. Jeremy also serves as Coordinator of the Better Identity Coalition, an organization focused on developing and advancing consensus-driven, cross-sector policy solutions that promote better solutions for identity verification and authentication.
